Website Design Case Study – Worvi.com

Internet Business Ideas: Every internet business is different and I know most people have been dreaming about starting their own business for ever. I would like to know, in your own words, what your idea was for www.Worvi.com.

The idea is simple in its conception, but complex in its implementation. I have five kids that spend some of their time chatting, some surfing the web, some buying products and services, and some playing 3D games, well why not merge all activities into one, where you have a virtual world where you do most of the activities you do in the real world.

Why you decided to start your own internet business: I would like to know / share with others why you decided to start this internet business. Everyone has a different story and I would like to know yours.

I have a degree in Computer Science, another one in Electrical Engineering and a third one as a MBA. Even though most of my education time was spent in technological programs, most of my working experience has been on the financial field. So my passion for technology has never been fully satisfied and that is why I finally decided to follow my heart and start a new business in the information technology industry and what better and challenging field within that industry than the internet.

Why you decided to go with WebBizIdeas.com: We are very interested in knowing why you chose our company. Whether you just liked our portfolio or just liked hearing our voices over the phone, we would like to know 😊

Experience. I was looking for a company that knew how to develop social sites and had an idea on how to do it in a different way. After a couple of conversations with WebBizIdeas I was certain I had found the right company for my project.

Your Website Design: Can you tell customers about how / why you had us design your website the way it is. Please let us know in your own words how WebBizIdeas.com designed your site. Are you happy with it, do you have future plans to develop it more?

Well WebBizIdeas had experience in building social sites and it has a sister company that has experience building 3D applications, it was easy for me explaining the idea behind my project and then let WebBizIdeas people develop it merging both technologies. I do have future plans to continue developing the project into a full working version of the prototype we built and I am very excited about it.

Who is your target audience? Can you tell us more about your target audience? This will be very helpful for you in the search engines if you include 'keywords' that you are trying to obtain listings for in the search engines.

My immediate target market are young people ages 12 to 25 living in the U.S. currently using social or chat sites that have a need for buying products and services from the internet, and like to surf the web. Basically people they spend at least one to two hours a day in front of a PC connected to the internet.

Overall Feedback: Can you give us your overall feedback on how you liked working with WebBizIdeas.com and your project manager?

I liked very much working with WebBizIdeas.com, especially because WebBizIdeas people are very proactive, they do not wait for me to come out with a better solution, they are always thinking on how the customer's project can be developed with the right tools and with the best functionality. My project manager was very helpful providing his expertise at all times, and he was always available to answer all my questions and doubts.

Current Advertising & Promotions: We are very interested in knowing what our customers are doing for advertising & promotions. If you could share what you are doing and if any companies are working for you that would be greatly appreciated. We would love to know if you are having success.

I have no advertising at this time.
